Initiative for
Open University
of Nepal
OUN (ओ.यु.एन.)

**Higher Education for all
Who has determination
To achieve degree,
Upgrade skills and
knowledge.**

Introduction

Nepal needs to increase skilled and qualified work force to increase productivity and to move ahead towards development. This dream can not come true when large number of population can not afford expensive cost for higher education. Distance and online education is a need in the circumstance. Open University of Nepal is materializing the concept of affordable distance education. Students will not have to travel to big cities and foreign countries for quality and technical education. They can get education and get training by working at the same time.

Goal

Quality education

All the courses are offered by highly qualified and experienced academicians, post graduates and graduates from around the world using latest available technology. Course programs are developed with work place required information so that graduates could land in job as they graduate and work with confidence.

Focus

Accessibility

Higher academic record or class requirements are not imposed for admission. Only some preparation program may require.

Affordability

Students have choice to receive education at their home and their community. Cost of travelling to big cities, moving and living in new places will be saved.

Flexibility

Students can choose their convenient time slots for the courses they want to take. That will allow students to work as well as improve their knowledge and skills simultaneously.

Programs

Phase I

- **Agriculture and Rural Development**
- **Education**
- **Engineering and Technology**
- **Health Studies**
- **Human Studies**
- **Information Management**
- **Natural resources and Environment**

Programs which are more demanding in rural areas will be added in other phases.
